WOODRUFF - IMPERIAL

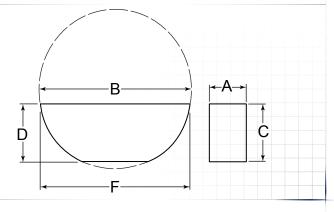

DESCRIPTION

Woodruff keys are commonly found in machine tools and automotive applications. They are designed to be installed deep into a shaft and firmly embedded. As a result, they are less likely to slip out of the key way. Both round and flat bottom designs are standard and function equally. If a specific style is required, please contact our Sales Team.

HOW TO IDENTIFY

- 1. Verify half-moon shape.
- 2. Measure diameter (B).
- 3. Measure width (A).
- 4. Find the part number in the chart on the next page. Or, compare your part to the part silhouettes in the chart on the next page.
